## **2<sup>nd</sup> Annual STERG SolarPACES Symposium**

17 July 2014

Stellenbosch, South Africa

SOLAR THERMAL ENERGY  
RESEARCH GROUP

The Solar Thermal Energy Research Group (STERG) is hosting its second annual SolarPACES endorsed national symposium to provide researchers with the opportunity to present their research (after completion or while still in progress). The symposium will take place on the **17<sup>th</sup> July 2014** in room K302 at the Engineering Knowledge Centre, Faculty of Engineering, Stellenbosch University. The focus of the symposium is on concentrating solar power (CSP) and solar process heat. The programme will be communicated in due course.

This symposium will precede the Centre for Renewable and Sustainable Energy Studies (CRSES) symposium that will take place on **18 July**, which focuses on wind, ocean, bio-energy and solar PV.

All academics and students as well as members of the public and industry with an interest solar thermal power and heat are welcome to attend the 2<sup>nd</sup> Annual STERG symposium.

Those who wish to present their work will be required to submit abstracts that will be published on the symposium website. Abstracts will be published in the symposium proceedings. To this end, a call for abstracts will be circulated in **April 2014**.

Those who are interested in participating and wish for further information can contact Matti Lubkoll (matti@sun.ac.za) or Kenny Allen (kallen@sun.ac.za). Further information will be made available on [concentrating.sun.ac.za](http://concentrating.sun.ac.za).
